

Online Web Sites to Help Solve Computer Problems

Introduction

The workshop introduces web sites and online tools to help you to diagnose and fix computer problems.

Website searches

The sites can be found using the Google Search tool. Use, (but do not restrict yourself to) keywords like:

- [pc repair flow chart](#)
- [computer help websites](#)
- [Computer Repair Flowchart, Diagnostic Diagram For PC Repair](#)
- [online malware check](#)
- [best free technical support sites](#)
- [how to fix a computer that wont start](#)
- [free computer repair books](#)

Useful tools

Online, built in or downloadable tools for checking your computer

- [CCleaner](#) for registry cleanup
- [Online antivirus and anti malware tools](#)
- [Scannow](#) for repairing protected Windows operating system files
- [Scan disk](#) for drive errors (check both boxes).
- [System restore](#) (use in safe mode if problems)
- [Memtest](#) is a RAM reliability tester. It evaluates the ability of your computer's memory to store and retrieve data without errors.
- [Speccy](#) - a useful tool to check your computer – especially temperatures
- [Hirens Boot CD](#) (495 MB download) – [with all these free tools](#) – and which can also be [put on a flash drive](#).

Useful ebooks

- [Ultimate Computer Repair Guide.pdf](#)
- [computer_repair_with_diagnostic_flowcharts\(1\).pdf](#)
